E-Logistics

L4 Epsilon

software vendor for order picking

Organize your e-logistics

Prepare your parcels

Steer your e-commerce business

L4 Epsilon™ is a simple and reliable solution made up of a software package and sorting devices.
L4 Epsilon™ provides you with an effective and complete order picking process :

- Product identification
- Supplier receiving
- Parcel filling
- Packing
- Shipping
- Operational reporting
- Returns management

E-commerce / Multi-channel

Your logistics is now an asset !

Increase in number of products, single-item order, order personalization, workload peaks, rapid growth, etc. : This is the daily challenge of Logistics and Marketing managers. L4 Epsilon helps you to turn these challenges into opportunities. You can now give value to your logistics, easily develop new services and increase your client's satisfaction to make the difference that counts.

With L4 Epsilon, your logistics becomes your key to success.

Focus on

The L4 Epsilon™ process

1. The bulk picking

The process begins with a bulk picking of all products to be shipped at the end of the day. The bulk is completed by products received just in time from suppliers.

2. Successive sortings

Bulk products are dispatched to customers orders by successive sorts. L4 Epsilon ensures a 100% quality of preparation thanks to light-guided deposit control.

3. Packing & Shipping

At the end of successive sorts, orders are packed and labeled for transport.

Your logistics partner

L4 Epsilon guarantees a 100% quality for your parcels

- Zero error guarantee : performing deposit control at each process step, operator monitoring
- Flexibility and scalability : in dealing with volume peaks, in changing product formats, in accompanying activity growth
- Simplicity : fast learning for operators, easy integration of temp people
- Significant increase in order picking productivity even during work peaks
- Ability to support Just-In-Time and in-stock process, or both
- Fast ROI : from 6 to 18 months depending on projects

L4 Epsilon is a software vendor which helps companies to deal with tailored logistics for E-commerce, Multi-channel sales and store-picking. L4 Epsilon solution is used by fifty clients to run their logistics flows. The L4 Epsilon solution is a world-wide patented process.
